

Keeping the higher score raises median SigMOS to 3.305

Per recording: use full-cascade audio if its overall SigMOS is higher; otherwise use original

501 processed + 299 original · same 800 recordings · identical bins and axes

Overall SigMOS · higher is better (1–5 scale)

Full cascade: ClearVoice → Sidon → DeepFilterNet3, full strength. 100 recordings per source.

Hypothetical selection using these measured scores; no audio or training data changed.
