

Best single MFA method: ClearVoice → Sidon → DF3 · 100% · median 3.162

Same 800 recordings · 100 per source · all processing uses shared MFA boundaries

Dots: medians. Whiskers: median ± population SD across recordings; these are not confidence intervals.

710 aligned crops; 90 flagged alignments preserved untrimmed. Native reference is excluded from both selectors.

Bottom four rows are per-item selection policies. Filtered rows contain fewer, higher-scoring items; n is shown explicitly.
